Notice of Privacy Practices

This notice describes how medical information about you may be used and disclosed and how you can get access to this information. Please review it carefully.

If you have any questions about this notice, please contact the Palomar Health Medical Group Privacy Office at 1.877.376.3930. This notice describes Palomar Health Medical Group’s practices and that of:

- Any health care professional authorized to enter information into your health record.
- All departments and clinic sites of Palomar Health Medical Group.
- Any member of a volunteer group we allow to help you while you are in our care.
- All employees, staff and other Palomar Health Medical Group personnel.
- Affiliated Physicians

All these entities, sites and locations follow the terms of this notice. In addition, these entities, sites and locations may share medical information with each other for treatment, payment or health care operations purposes described in this notice.

The providers participating in this notice (referred to as “we”) understand that medical information about you and your health is personal. We are committed to protecting medical information about you. We create a record of the care and services you receive during your visit with us. We need this record to provide you with quality care and to comply with certain legal requirements. This notice applies to all of the records of your care generated by any of the Palomar Health Medical Group sites or affiliated entities, whether made by Palomar Health Medical Group personnel or your personal doctor. Your personal doctor may have different policies or notices regarding the doctor’s use and disclosure of your medical information created in the doctor’s office or clinic. This notice tells you about the ways we may use and disclose your medical information. This notice also describes your rights and certain obligations we have regarding the use and disclosure of medical information.

We are required by law to make sure that medical information that identifies you is kept private (with certain exceptions), to notify you of our legal duties and privacy practices with respect to medical information about you, to notify you if a breach of your medical information occurs, and to follow the terms of the notice of privacy practices currently in effect.

HOW WE MAY USE AND DISCLOSE HEALTH INFORMATION ABOUT YOU

For each category of uses or disclosures we will explain what we mean and try to give some examples. Not every use or disclosure in a category will be listed. However, all of the ways we are permitted to use and disclose information will fall within one of the categories.

DISCLOSURE AT YOUR REQUEST

We may disclose information when requested by you. This disclosure at your request may require a written authorization by you.

Treatment – We may use medical information about you to provide you with medical treatment or services. We may disclose medical information about you to doctors, nurses, technicians, pharmacists, health care students or other Palomar Health Medical Group personnel and workforce members who are involved in providing for your well-being during your visit with us. For example, a doctor treating you for a broken leg may need to know if you have diabetes because diabetes may slow the healing process. Additionally, the doctor may need to tell the dietitian if you have diabetes so we can arrange for appropriate meals. Different departments within Palomar Health Medical Group also may share medical information about you in order to coordinate the different things you need, such as prescriptions, lab work and X-rays. We also may disclose medical information about you to people outside of Palomar Health Medical Group who may be involved in your medical care after you leave us, such as skilled nursing facilities, home health agencies and physicians or other practitioners, including, without limitation, your primary care provider, so they can provide care or coordinate continuing care.

For Payment – We may use and disclose your medical information so that the treatment and services you receive at our facilities or from us may be billed and payment collected from you, an insurance company, a third party or a collection agency. For example, we may need to give information about a medical service you received at a PHMG clinic to your health plan so it will pay us or reimburse you for the medical service. We may also tell your health plan about a proposed treatment to determine whether your plan will cover the treatment. We may also provide basic information about you and your health plan, insurance company or other source of payment to practitioners outside the hospital who are involved in your care, to assist them in obtaining payment for services they provide to you.

For Health Care Operations – We may use and disclose medical information about you for health care and business operations, a variety of activities necessary to run our health care facilities and ensure all of our patients receive quality care. For example, we may use medical information to review the quality and safety of our treatment and services, to evaluate the performance of our staff in caring for you, or for business planning, management and administrative services. We may also use and disclose your medical information to an outside company that performs services for us such as accreditation, legal, computer or auditing services. These outside companies are called business associates and are required by law to keep your medical information confidential. We may also disclose information to doctors, nurses, technicians, medical students and other hospital personnel for review and learning purposes. We may remove information that identifies you from this set of medical information so others may use it to study health care and health care delivery without learning who the specific patients are.

Fundraising Activities – We may use information about you, or disclose such information to a foundation related to Palomar Health Medical Group, to contact you in efforts to raise money for our health care organization and its operations. You have the right to opt out of receiving fundraising communications. If you receive a fundraising communication, it will tell you how to opt out.

Marketing and Sale – Most uses and disclosures of medical information for marketing purposes, and disclosures that constitute a sale of medical information, require your authorization.

To Individuals Involved in your Care or Payment for your Care – We may release medical information about you to a friend or family member who is involved in your medical care. We may also give information to someone who helps pay for your care. In addition, we may disclose medical information about you to an organization assisting in a disaster relief effort so your family can be notified about your condition, status and location.

For Research – Under certain circumstances, we may use and disclose medical information about you for research purposes. For example, a research project may involve comparing the health and recovery of all patients who received one medication to those who received another, for the same condition. All research projects, however, are subject to a special approval process. This process evaluates a proposed research project and its use of medical information, trying to balance the research needs with patients’ need for privacy of their medical information. Before we use or disclose medical information for research, the project will have been approved through this research approval process, but we may, however, disclose medical information about you to people preparing to conduct a research project, for example, to help them look for patients with specific medical needs, as long as the medical information does not leave our facilities or offices.

As Required by Law – We will disclose medical information about you when required to do so by federal, state or local law.

To Avert a Serious Threat to Health or Safety – We may use and disclose medical information about you when necessary to prevent a serious threat to your health and safety or the health and safety of the public or another person. Any disclosure, however, would only be to someone able to help prevent the threat.

Psychotherapy Notes – Most uses and disclosures of psychotherapy notes require your authorization.

Organ and Tissue Donation – We may release medical information to organizations that handle organ procurement or organ, eye or tissue transplantation or to an organ donation bank, as necessary to facilitate organ or tissue donation and transplantation.

Military and Veterans – If you are a member of the armed forces, we may release medical information about you as required by military command authorities. We may also release medical information about foreign military personnel to the appropriate foreign military authority.

Workers’ Compensation – We may release medical information about you for workers’ compensation or similar programs. These programs provide benefits for work-related injuries or illness.

Public Health Activities – We may disclose medical information about you for public health activities. These activities generally include the following:

- To prevent or control disease, injury or disability;
- To report births and deaths;
- To report regarding the abuse or neglect of children, elders and dependent adults;
- To report reactions to medications or problems with products;
- To notify people of recalls of products they may be using;
- To notify a person who may have been exposed to a disease or may be at risk for contracting or spreading a disease or condition;

- To notify the appropriate government authority if we believe a patient has been the victim of abuse, neglect or domestic violence. We will only make this disclosure if you agree or when required or authorized by law;
- To notify emergency response employees regarding possible exposure to HIV/AIDS, to the extent necessary to comply with state and federal laws.

Health Oversight Activities – We may disclose medical information to a health oversight agency for activities authorized by law. These oversight activities include, for example, audits, investigations, inspections and licensure.

These activities are necessary for the government to monitor the health care system, government programs and compliance with civil rights laws.

Lawsuits and Disputes – If you are involved in a lawsuit or a dispute, we may disclose medical information about you in response to a court or administrative order. We may also disclose medical information about you in response to a subpoena, discovery request or other lawful process by someone else involved in the dispute, but only if efforts have been made to tell you about the request (which may include written notice to you) or to allow you to obtain an order protecting the information requested.

Law Enforcement – We may release medical information if asked to do so by a law enforcement official:

- In response to a court order, subpoena, warrant, summons or similar process;
- To identify or locate a suspect, fugitive, material witness or missing person;
- About the victim of a crime if, under certain limited circumstances, we are unable to obtain the person’s agreement;
- About a death we believe may be the result of criminal conduct;
- About criminal conduct at our facility(ies); and
- In emergency circumstances to report a crime; the location of the crime or victims; or the identity, description or location of the person who committed the crime.

Coroners, Medical Examiners and Funeral Directors – We may release medical information to a coroner or medical examiner. This may be necessary, for example, to identify a deceased person or determine the cause of death. We may also release medical information about patients of the hospital to funeral directors as necessary to carry out their duties.

National Security and Intelligence Activities – We may release medical information about you to authorized federal officials for intelligence, counterintelligence and other national security activities authorized by law.

Protective Services for the President and Others – We may disclose medical information about you to authorized federal officials so they may conduct investigations or provide protection to the President, other authorized persons or foreign heads of state.

Inmates – If you are an inmate of a correctional institution or under the custody of a law enforcement official, we may disclose medical information about you to the correctional institution or law enforcement official as a authorized or required by law. This disclosure would be necessary 1) for the institution to provide you with health care; 2) to protect your health and safety or the health and safety of others; or 3) for the safety and security of the correctional institution.

Special Categories of Information – In some circumstances, your health information may be subject to restrictions that may limit or preclude some uses or disclosures described in this notice. For example, there are special restrictions on the use or disclosure of certain categories of information — e.g., tests for HIV or treatment for mental health conditions or alcohol and drug abuse.

Health Information Exchange (HIE) – We may share your health information electronically with other organizations where you receive health care. Sharing information electronically is a faster way to get your health information to the health care providers treating you. HIE participants are required to meet rules that protect the privacy and security of your health and personal information.

Secure Patient Portal – We have established a web-based system, called a Patient Portal, which allows us to securely communicate and transfer health care information to you. With your consent, you will receive a user ID and password to access the Patient Portal. If your user ID or password to your Patient Portal is obtained by another person, your medical information is subject to improper disclosure. Please notify us immediately if you feel your Patient Portal is being improperly accessed.

Your Rights as an Palomar Medical Group Patient

You have a legal right to make known your wishes about your medical care, including the right to accept or refuse treatment. The document "Advance Health Care Directive" is a means to specify your wishes and to make them legally binding.

What is an Advance Health Care Directive?

This is a legal document that enables you to specify your desires about life-sustaining treatment. It also allows you to name someone you trust to speak for you when you are incapacitated. This document replaces "Living Wills" and the "Durable Power of Attorney for Health Care". You can identify your primary care physician and specify your wishes about CPR, feeding tubes, breathing machines, pain medication, organ donation and other desires.

Oswestry Low Back Pain Disability Questionnaire

Sources: Fairbank JCT & Pynsent, PB (2000) The Oswestry Disability Index. *Spine*, 25(22):2940-2953.

Davidson M & Keating J (2001) A comparison of five low back disability questionnaires: reliability and responsiveness. *Physical Therapy* 2002;82:8-24.

The Oswestry Disability Index (also known as the Oswestry Low Back Pain Disability Questionnaire) is an extremely important tool that researchers and disability evaluators use to measure a patient's permanent functional disability. The test is considered the 'gold standard' of low back functional outcome tools ^[1].

Scoring instructions

For each section the total possible score is 5: if the first statement is marked the section score = 0; if the last statement is marked, it = 5. If all 10 sections are completed the score is calculated as follows:

Example: 16 (total scored)
 50 (total possible score) x 100 = 32%

If one section is missed or not applicable the score is calculated:

 16 (total scored)
 45 (total possible score) x 100 = 35.5%

Minimum detectable change (90% confidence): 10% points (change of less than this may be attributable to error in the measurement)

Interpretation of scores

0% to 20%: minimal disability:	The patient can cope with most living activities. Usually no treatment is indicated apart from advice on lifting sitting and exercise.
21%-40%: moderate disability:	The patient experiences more pain and difficulty with sitting, lifting and standing. Travel and social life are more difficult and they may be disabled from work. Personal care, sexual activity and sleeping are not grossly affected and the patient can usually be managed by conservative means.
41%-60%: severe disability:	Pain remains the main problem in this group but activities of daily living are affected. These patients require a detailed investigation.
61%-80%: crippled:	Back pain impinges on all aspects of the patient's life. Positive intervention is required.
81%-100%:	These patients are either bed-bound or exaggerating their symptoms.
