Federal Withholding

IMPORTANT: Effective 1/1/20, the IRS made significant changes to the design of Form W-4. Form W-4 no longer uses the concept of withholding allowances, which was previously tied to the amount of the personal exemption. Employees who have furnished Form W-4 in any year prior to 2020 are not required to furnish a new form merely because of the design, and their withholding will continue to compute based on the information from the most recently furnished W-4. All new employees first paid after 2019 or employees who furnished Form W-4 in any year prior to 2020, but wish to adjust their withholding, must use the redesigned form.

Complete Form W-4 so that your employer can withhold the correct federal income tax from your pay.
Give Form W-4 to your employer.
Your withholding is subject to review by the IRS.

Last name
(b) Social security number

Step 1: Enter Personal Information

(c) ☐ Single or Married filing separately
☐ Married filing jointly (or Qualifying widow(er))
☐ Head of Household (Check only if you're unmarried and pay more than half the costs of keeping up a home for yourself and a qualifying individual.)

Complete Steps 2-4 ONLY if they apply to you; otherwise, skip to Step 5. See page 2 for more information on each step, who can claim exemption from withholding, when to use the estimator at www.irs.gov/W4App, and privacy.

Complete this step if you (1) hold more than one job at a time, or (2) are married filing jointly and your spouse also works. The correct amount of withholding depends on income earned from all of these jobs.
Do only one of the following:
(a) Use the estimator at www.irs.gov/W4App for most accurate withholding for this step (and Steps 3-4); or
(b) Use the Multiple Jobs Worksheet on page 3 and enter the result in Step 4(c) below for roughly accurate withholding; or
(c) If there are only two jobs total, you may check this box. Do the same on Form W-4 for the other job. This option is accurate for jobs with similar pay; otherwise, more tax than necessary may be withheld. ☐

TIP: To be accurate, submit a 2022 Form W-4 for all other jobs. If you (or your spouse) have self-employment income, including as an independent contractor, use the estimator.

Complete Steps 3 through 4(b) on Form W-4 for only ONE of these jobs. Leave those steps blank for the other jobs. (Your withholding will be most accurate if you complete Steps 3-4(b) on the Form W-4 for the highest paying job.)

If your income will be \$200,000 or less (\$400,000 or less if married filing jointly):

Step 3: Claim Dependents

Multiply the number of other dependents by \$500 \$ 0

Add the amounts above and enter the total here 3 \$

Step 4 (optional): Other Adjustments

(a) Other income (not from jobs). If you want tax withheld for other income you expect this year that won't have withholding, enter the amount of other income here. This may include interest, dividends, and retirement income. 4(a) \$

(b) Deductions. If you expect to claim deductions other than the standard deduction and want to reduce your withholding, use the Deductions Worksheet on page 3 and enter the result here. 4(b) \$
